

Aldert Kamp is the Co-director of the [CDIO Initiative](#) and the immediate past director of Education at TU Delft Faculty of Aerospace Engineering (2007-2020) and Delft leader of [4TU.Centre for Engineering Education](#) (2014-2020). He has been deeply involved in the rethinking of higher engineering education with a horizon of 2030. More than 20 years of industrial experience in space systems engineering, 19 years of academic teaching, educational management and leadership, and an in-depth study of trends in society, engineering business, science and technology and higher engineering education, have made him a thought-leader in the future of engineering education. He is the author of the thought-provoking reports (2016) [Engineering Education in a Rapidly Changing World](#) and (2020) [Navigating the Landscape of Higher Engineering Education](#). Since July 2020 he is self-employed in his one-person [Aldert Kamp Advies](#) business.
